

DOSING AND ADMINISTRATION

TNR CBD BALANCE

Day 1 - Day 3

Start with an amount equal to **1/4 grain of rice once daily (PM)** to acclimate your system.

Day 4 - Day 7

Increase amount to equal the size of **1/2 grain of rice once daily (PM)**

Note: Make notes on how you feel an hour or so after administration so as to gauge improvements in the areas you are looking for

Day 8 - Day 11

Gradually increase the dosage until you find the optimal dose for yourself. With the TNR CBD Balance, that can range **from the equivalent of 1-4 grains of rice**

Topical Dosing:

TNR CBD Balance can be applied topically to cancerous lesions. Apply a small amount to the lesion, cover with a band-aid until it soaks into the skin. If dealing with a larger area, emulsify the TNR CBD Balance using an oil based product such as TNR CBD Canna-Oil, Olive Oil or Coconut Oil.

Note: Onset of action is individual and results may vary.

Rectal Dosing

TNR CBD Balance is primarily taken orally, but can also be administered rectally.

For detailed instructions on rectal administration, please see **“Rectal Suppository Administration”** information sheet.

The main ingredient of TNR CBD Balance is Cannabinol (CBD). Our Cannabinoid receptors are an important system in establishing and maintaining human health. Cannabinoids are known to promote homeostasis at every level of biological life.

* This product has a long shelf life provided it is stored in a cool, dry place, out of direct sunlight.
